

XL - VERTICAL LEVEL GAUGES WITH METAL CASING

XLT - VERTICAL LEVEL GAUGES WITH METAL CASING WITH THERMOMETER

XLT/PLAST - VERTICAL LEVEL GAUGES WITH PLASTIC CASING

External protection made from painted steel

External protection made from DA66 fiberglass

Thermoplastic level gauges made from transparent polyamide which provides good mechanical resistance and is impervious to mineral oil, gasoline, lubricants, petroleum, solvents and most chemical agents.

External protection is provided by a pressed steel casing with black painted finish. Also available in **version VL** with side openings to allow visibility from both sides.

Avoid contact with alcohol based solutions and antifreeze liquids at high temperatures and hot water over 80°C

Max working temperature 90°C , max pressure suggested 2 bar

These level gauges are used in oil and fuel tanks of many types , due to their ability to remain clear in the majority of the conditions; the transparent body of the level gauge retains it's transparency under most climatic conditions.

The body of the level gauge is made by ultrasonically welding two halves together to ensure a leak free seal

around the body. Inside is fitted a white screen with minimum and maximum level indication. External seal is guaranteed by o'rings and flat rubber washers on each fixing bolt.

The mounting of the level gauge can be made externally by providing 2 threaded holes M10 or M12 on 76 mm or 127 mm centre distance, tolerance +/- 0.3mm. Alternatively they can be secured internally through 2 plain holes 10.2 mm or 12.2 mm, tolerance 0 + 0.2 mm using the flanged nuts provided. Maximum tightening torque suggested 5 Nm.

Model XLT is equipped with an internal thermometer scaled in degrees Celsius 0-100°C and Fahrenheit 50-200°F (0-80°C / 50-150F model XL/03T).

P= Metal shell
 V= Hollow bolt
 D= Flanged hex nut
 G= Flat NBR seal
 C= Transparent body

Special versions

- XL-T/CX made from special resin resistant to fluid containing alcohol
- XL-T/RB "with floating" red ball to improve visibility of the fluid level of light colored liquid
- XL-T/PLAST: external casing made from polyamide 66 30% fiberglass.

XL/10 - VERTICAL LEVEL GAUGES 10" WITH METAL CASING

XL/10T - VERTICAL LEVEL GAUGES 10" WITH METAL CASING AND THERMOMETER

- P= Metal shell
- V= Hollow bolt
- D= Flanged hex nut
- G= Flat NBR seal
- C= Transparent body

Vertical level gauges center-to-center distance 10" (254 mm); external protection is provided by a pressed steel casing with black painted finish.

Transparent internal pipe made from Polycarbonate; avoid contact with Gasoline, Diesel fuel , Alcohol and most solvents.

Max working temperature 100°C , max pressure suggested 2 bar

The mounting of the level gauge can be made externally by providing 2 threaded holes M12 on 254 mm centre distance, tolerance +/- 0.3mm. Alternatively they can be secured internally through 2 plain holes 12.2 mm, tolerance 0 + 0.2 mm using the flanged nuts provided. Maximum tightening torque suggested 5-7 Nm.

Model XLT is equipped with an internal thermometer scaled in degrees Celsius 0-100°C and Fahrenheit 50-200°F
